Project Overview

Restarab is a cryptocurrency designed to facilitate seamless payments in restaurants, hotels, and other hospitality businesses in Arab countries and beyond. With Restarab, customers can easily pay for their services using cryptocurrency, while receiving exclusive bonuses. This solution seeks to bridge the gap between traditional payment methods and cryptocurrency adoption, particularly in the hospitality sector.

The token aims to incentivize both businesses and users. By integrating cryptocurrency payments, Restarab not only offers a new, faster method of paying, but also introduces rewards through airdrops for users and businesses who embrace this new technology.

Problem Statement

Despite the rapid rise of cryptocurrency, the adoption of digital currencies as a mainstream payment method in many industries, especially hospitality, remains limited. One major challenge is the slow adoption rate in the world where traditional payment methods dominate.

Restarab aims to resolve this by:

- Speeding up cryptocurrency payments in restaurants, hotels, and related businesses.
- Offering exclusive bonuses to users who pay with Restarab at participating establishments.
- Providing airdrops to both holders and businesses that accept cryptocurrency payments, fostering a community-driven ecosystem.

By creating an ecosystem where both businesses and users benefit from adopting cryptocurrency payments, Restarab strives to bridge the gap between digital currencies and traditional commerce.

Technology

Restarab is built on the Binance Smart Chain (BSC) due to its low transaction costs, high-speed transactions, and robust security features. The choice of BSC ensures that users can benefit from faster payments, lower fees, and greater scalability while enjoying the advantages of decentralized finance.

By utilizing BSC, Restarab also taps into the existing ecosystem of decentralized applications (dApps), liquidity pools, and the broader BSC community, enhancing its chances of adoption.

Primary Use Cases

The primary use case for Restarab is as a payment method. It allows users to pay at restaurants, hotels, and other businesses that have integrated Restarab as a payment option.

Customers will be able to:

- Pay for their meals, stays, or services using Restarab tokens
- Receive bonuses and rewards for using the token as a payment method
- Engage in the Restarab ecosystem by using it for additional services within the hospitality industry.

For businesses, accepting Restarab tokens as payment opens up new revenue streams, attracts crypto enthusiasts, and increases overall customer satisfaction by offering a modern payment alternative.

Tokenomics

Restarab's tokenomics are designed to ensure a sustainable and growth-oriented ecosystem. The total supply of Restarab tokens is fixed at 10,000,000. These tokens are allocated across different phases of the project to support growth, rewards, and liquidity.

- Presale: 30% (3,000,000 tokens)

To kickstart the project, 30% of the total supply will be offered in the presale phase. This provides initial liquidity and participation, allowing early investors to buy into the project.

- Rewards: 30% (3,000,000 tokens)

Reserved for long-term holders, partners, and active users, this portion incentivizes users who stay engaged with the project and use Restarab for payments. Airdrops and rewards will be distributed to maintain loyalty and drive engagement.

- Marketing: 20% (2,000,000 tokens)

Marketing efforts, including partnerships with influencers, social media campaigns, and advertising, will receive 20% of the total supply. These efforts aim to ensure broad awareness and adoption of Restarab within both the crypto and hospitality communities.

- Project Development: 10% (1,000,000 tokens)

This portion ensures the continued development of the project, supporting the creation of new features, improvements, and technological advancements to enhance the functionality of Restarab.

- Liquidity: 10% (1,000,000 tokens)

The liquidity pool will ensure that tokens can be easily traded on exchanges, providing stability for users and investors. This will also help to maintain a consistent price for the token across different platforms.

Roadmap

2026

January

- Token contract creation

February

- Establishment of social media channels

- Initial marketing campaigns

- Community building campaigns

March

April

- Audit and public disclosure of the smart contract

- First exchange listing

- Bridge and exchange test launch

May

- Extensive marketing campaigns to increase awareness

June

July

- Ongoing marketing efforts to drive mass adoption

- Continued integration with businesses in the hospitality sector

August

- Expansion of airdrop campaigns to incentivize active users

September

Q1 2026:

- Token contract creation
- Establishment of social media channels
- Initial marketing campaigns
- Community building campaigns

Q2 2026:

- Audit and public disclosure of the smart contract
- First exchange listing
- Bridge and exchange test launch
- Extensive marketing campaigns to increase awareness

Q3 2026:

- Ongoing marketing efforts to drive mass adoption
- Continued integration with businesses in the hospitality sector
- Expansion of airdrop campaigns to incentivize active users

What we have at the moment?

- 100+ Restaurants Advertising: Over 100 restaurants and hospitality establishments are currently using Restarab as an advertising platform to promote their services
- Tourist Engagement: Tourists from Arab countries actively use the platform to discover and connect with restaurants and hotels, boosting visibility for these businesses
- Building Foundations for Future Integration: While cryptocurrency payments are not yet implemented, we are actively setting the stage for Restarab tokens to be accepted across these businesses in the future.

Team

Our team is a blend of blockchain professionals, web managers, and advertising experts working across three countries. Alongside our human team, we also actively use Artificial Intelligence (AI) to enhance decision-making, strategy optimization, and streamline various aspects of our project. AI plays a critical role in ensuring efficiency, scalability, and helping us stay ahead in the rapidly evolving cryptocurrency market.

AI is an integral part of our operations, working alongside our team members to analyze data, predict trends, and make informed decisions. It functions like a team member, providing valuable insights and helping us automate complex processes, ultimately improving user experience and project development.

Community & Marketing

The key to success for Restarab lies in the growth of its community. To achieve this, we will:

- Partner with influencers and local personalities in the crypto and hospitality space to create awareness.
- Leverage social media platforms to engage with potential users and businesses.
- Host events, both online and offline, to educate users and businesses about the benefits of using Restarab.
- Foster an engaged community through regular updates, AMAs (Ask Me Anything), and reward programs for active participants.

We will also be running regular promotions and campaigns to incentivize both users and businesses to join the ecosystem.

Legal and Compliance

The Restarab project is committed to complying with applicable laws and regulations. The legal structure and jurisdiction of the project will be carefully selected to ensure that Restarab complies with both local and international cryptocurrency regulations. We are consulting with legal experts to ensure that our token distribution, presale, and operations adhere to all relevant legal frameworks, especially concerning financial regulations, anti-money laundering (AML), and know-your-customer (KYC) requirements.
